EREMURUS

(Foxtail Lilies)

True aristocrats of the garden are the Eremurus or Foxtail Lilies. Coming as they do from the desert region of Turkestan, these Desert Candles are always objects of curiosity in American gardens. They are hardy and dependable, making a spectacular show from late May through June, and they come back year after year. Plant 6 inches deep in rich, porous, loamy soil. They require sunny, well-drained locations. They are best planted in the fall, and then mulched over winter with straw or any other material of similar nature. The flower spikes, often 6 or more feet tall, rise like great asparagus tips from a mass of yucca-like foliage. The roots multiply rapidly, and clumps of Desert Candles make an imposing mass in the shrubbery border or the perennial garden. The foliage disappears after the flowers, and annuals may be planted close to them to fill the vacant space. They are much more effective when planted in groups of not less than three, and more whenever possible. It is no wonder these plants are expensive when you consider that it takes five years to grow one to blooming size. Those we offer are five years old or more, and are of blooming size.

SHELFORD HYBRIDS

Probably the most beautiful strain. Pastel shades—coppery pink, orange, pale yellow, pink, etc.—excellent for the garden and as cut flowers. These grow to an average height of 6 feet and make a stunning show in the garden, as well as indoors when cut, lasting two or three weeks in water.

Bulbous Iris

Inexpensive, Easy-to-Grow, Orchid-like Blooms

DUTCH IRIS

Often called the "Poor Man's Orchid" because of their beautiful orchid-like blooms. They are easily grown in the garden, for they are hardy and come back year after year. They bloom during May and June and their average height is 18 to 24 inches. Bulbous Iris are much more effective when planted in groups; they prefer well-drained, sunny locations. Plant the bulbs 4 to 6 inches deep and 4 to 5 inches apart.

Hardy Garden Lilies

These glorious new and better Lilies were grown in Oregon, on the slopes of Mount Hood. Order bulbs now. AURATUM PLATYPHYLLUM — (Goldband Lily). Immense blooms, from 7 to 9 inches across, exotic and richly scented. As many as 15 are borne on a mature plant, standing fully 6 or 7 feet high. Needs rich, well-drained soil and prefers light shade. Late fall planting gives best results. \$8.00 per 10; \$70.00 per 100.

AURELIAN HYBRIDS—All types and colors. From among thousands of seedlings of essentially Aurelian (*L. henryi* x trumpet lily) type, we selected originally three strains—the Golden Clarion, the Heart's Desire and the Sunburst types. But after this selection there remained a most beautiful group of Lilies, all of true hybrid origin, that did not fit any of these groups and yet were far too good and pretty to be discarded. We have now decided to offer these Lilies as a mixed strain. The main characteristics will be those of *L. henryi*, with broader petals, in new colors and often more trumpet-like habit. All Aurelians offered will be beautiful, vigorous and hardy Lilies. They will be of great value for mass planting and for cutting.

Large flowering size bulbs, \$7.50 per 10; \$70.00 per 100.

CANDIDUM, MADONNA LILY—Highly disease resistant. The foliage stays green long after the flower has gone. Must be planted very shallow. Order now and plant just as early as possible. \$3.50 per 10; \$30.00 per 100.

ENCHANTMENT—A most beautiful, vibrantly colored new hybrid with many large, cupped, upright flowers of an intense, blaring nasturtium-red. Long-lasting flowers. Late June and early July bloom. \$3.00 per 10; \$25.00 per 100.

ESTATE—A magnificent Lily for midsummer. Extra-large, pure white flowers freely produced on 4-foot stems. Plant 6 to 8 inches deep in average soil. \$4.00 per 10; \$35.00 per 100.

FIESTA HYBRIDS—Gracefully reflexed flowers with a glossy, rich sheen that makes them shine in the sun. \$4.50 per 10.

FIREFLAME—A vivid, sparkling Indian-red. Wide-petaled flowers of great substance that face straight upward and glossy, healthy foliage combine to make this a most rewarding plant. Late June flowering. Grows 2 to 3 feet tall. \$7.50 per 10.

FORMOSANUM—The latest flowering of all the popular Lilies, this white trumpet type is especially desirable for moderate climates. Often flowers as late as September. Our strain is tall and free flowering. Plant 5 to 6 inches deep in sun or partial shade; water during the summer. \$3.50 per 10; \$30.00 per 100.

GREEN MOUNTAIN HYBRIDS—An impressive group of trumpet Lilies with very large flowers, combined with a green throat and brown petal exteriors. Distinct in shape and color from Olympic Hybrids, and valuable for exhibition and specimen planting as well as cutting. Same culture as Olympic Hybrids; plant in very light shade. \$9.50 per 10; \$85.00 per 100.

HANSONI—A golden yellow Lily from Japan with reflexed, pendent flowers of great substance. One of the hardiest Lilies known, with deep green, glossy foliage in numerous whorls around the stem, which carries 5 to 10 large flowers. Does best in partial shade. \$6.00 per 10.

HEART'S DESIRE—Imagine a giant Regal Lily with huge, orange-throated flowers. These trumpet Lilies, fully as tall and vigorous, are of hybrid origin, which gives them added vigor and beauty. Huge pyramids of flowers in warm tones. \$1.10 each; \$10.00 per 10.

HENRYI—The purplish brown stems grow 5 to 8 feet tall, with shining, dark, pointed leaves. Blooms in late July and August, with 20 or more golden orange, recurved, pendent flowers. Likes slight shade. Since the tall, wiry stems bend with the wind and rain, it needs support by stakes or shrubbery. Plant 6 inches deep and 8 to 12 inches apart. \$4.50 per 10; \$40.00 per 100.

OLYMPIC HYBRIDS—The finest, tallest and largest trumpet Lilies yet produced. Broader and stronger flowers than the Regal Lily, with pyramidal flower heads. Flowers vary from ivory-white through soft green, with deeper green and russet tints on the outside. These graceful, 5 to 7-foot plants flower in July and do well in full sun or light shade. \$3.50 per 10; \$30.00 per 100.

OLYMPIC PINK—Selected from tens of thousands of Olympic Lilies. A strain with accentuated coloring and large, widely expanded flowers. They are apt to bleach in full sun. \$2.00 each; 3 for \$5.00.

RAINBOW HYBRIDS—A Candlestick Lily in gay, sparkling new colors. Vigorous and hardy. From 1 to 3 feet tall, they will grow anywhere. Colors range from pale straw-yellow to deepest maroon. June flowering. \$3.00 per 10; \$25.00 per 100.

ROYAL GOLD LILY (The Golden Regale Lily)—This beautiful new variety is identical with the best L. regale except for its true golden coloring. The flowers have a most attractive, glistening surface. Seed saved from this golden beauty will come true to color, so there is no reason why you should not try to grow some of these bulbs yourself. Royal Gold is without doubt one of the finest introductions in Lilies. Don't miss it! \$1.65 each; 3 for \$4.50; \$13.50 per 10.

SUNBURST STRAIN—These startlingly new, exotic Lilies are intermediate between the tall, orange, nodding Henryi Lily and the best of the Olympics. Five to 7-foot stems carry as many as 30 huge flowers for several weeks in July. \$1.00 each; \$9.00 per 10.

TENUIFOLIUM (pumilum)—The Coral Lily is one of the most easily grown and most popular. On thin, wiry stems seldom more than 2 feet tall, numerous bright scarlet or lacquer-red flowers are borne in June. Small and dainty. The petals are carmine-red with white margins, spotted with intense deep crimson. The petals are slightly crested on the inner edges near the base. The flowers are strongly but nicely scented. First time offered, very limited stock, not more than 2 per customer. Flowering-size bulbs. \$4.00 each.
